

ACTIVE SUBSTANCE COMBINATIONS HAVING
INSECTICIDAL AND ACARICIDAL PROPERTIES

ABSTRACT OF THE DISCLOSURE

The present invention relates to novel insecticidally and acaricidally active compound combinations of N^2 -[1,1-dimethyl-2-(methylsulphonyl)ethyl]-3-iodo- N^1 -{2-methyl-4-[1,2,2,2-tetrafluoro-1-(trifluoromethyl)ethyl]phenyl}phthalamide of the formula (I) and active compounds identified in the disclosure.
